

BENEFITTING THE ENVIRONMENT AND SUPPORTING LOCAL COMMUNITIES

NEWSLETTER
2022

The commitment and interest in our co-op has been invaluable in realising our ambitions for the future.

AGRI CO-OP RECEIVES LIVESTOCK

Mentorship, funding and the purchasing of livestock has been provided to Riverfresh Crop Primary Co-Op, a small agricultural business owned by six young farmers. Based in Kimberley, plans are in place to grow and prepare its livestock to sell to the local meat market.

This support forms part of a collaborative enterprise development initiative that invests in local youth-owned businesses. We look forward to seeing these farmers grow, thrive, and employ more local people!

ENTERPRISE HELPS THE ENVIRONMENT

As part of our ongoing support of youth-owned SMMEs, a vehicle to assist with recycling waste collections and deliveries has been funded to micro-business, 'Move-On-Up', which collects, separates, and recovers recyclables, as part of a local development initiative.

"The incineration of waste results in an irreversible and harmful environmental legacy, which is harmful to communities - this is one of the reasons that we have chosen to support this local business."

NEW CRÈCHE BRINGS SMILES TO GALESHEWE

A beautifully renovated crèche was handed over to the children and teachers amidst much excitement. The support for Loyiso Early Childhood Development Centre, in Galeshewe, covered urgent repairs and maintenance and forms part commitment to improve Early Childhood Development in the communities surrounding our solar power plant.

"Our creche is now beautiful and far safer."
Florence Montse,
School Principal

LOCAL SEWING BUSINESS GETS NEW WHEELS

A small local sewing business, 'Othie & Angie', has received a delivery vehicle to help their business grow. Previously, infrastructure support was provided along with business mentorship and training. This final assistance means the business can expand even further!
